(54) Title: MOISTURE-TIGHT EDIBLE FILM DISPENSER AND METHOD THEREOF

(57) Abstract: A film dispenser for dispensing individual strips of film comprising a main housing with an integrally attached hinged lid, wherein the housing and lid are one injection molded part that interfaces with a body and, when the closed, the lid creates a moisture tight seal with the main housing, the lid having a flexible arm attached to an underside of the lid, an opening in a topside of the main housing where a portion of the opening acts as a hinge point for the flexible arm, and, when the lid is opened, the arm assists in pushing or pulling the film out of the package; the body that is attached to the main housing to form a moisture tight seal with the main housing; and an indexing finger composed of an elastomer and attached to the underside of the hinged lid, the finger interacts with the flexible arm to dispense the individual strips.
